TRAFFICKING

I loaded a U-Haul in Seattle and drove down to Oregon. I dropped off 40,000 pounds of Durban poison gas with .5 purple diesel in Portland. I dropped off enough of the compounds to supply a field. They brought the seeds to farm that strain. I was now in the center of the city. I was from the East Coast but stayed in Seattle most days. That was why I was bussing down ounces and grams. I got work from catching bodies for a gang that have mob ties all over the world. I was gonna serve enough to run my own network.

I was in Portland and down to 10,000 in pounds in 3 days, which was around 4,000 thousand pounds. Then I went to meet with the plug in Las Vegas to bus down and get enough work to serve Seattle, Oregon, and Arizona. I bussed down a half a million dollars to get 3.9 million in work. The plug got 5 of us that moved work. Three of them were from the hit gang, and the other were mob ties. I brought the most work and funds to this project. I was gonna be back before the month was over.

I headed to Arizona from Vegas. I busted down 1.8 million worth of pounds. I grabbed more than what I came for, with the plug floating me 18 million dollars' worth of Durban poison gas. I didn't know any coke heads grabbing any other drugs.

I left Vegas with twenty-two million dollars' worth of weed in a U-Haul.

I served Arizona fifteen million dollars' worth of Durban poison gas in four days. With Oregon and Portland included, I got twenty hittas that pumped grams and ounces. After we linked, I dropped of pounds twenty ways a couple times in a day.

I have been moving work like this since I was eighteen. I started hitting at a young age.

I headed up to Seattle after supply enough for my goonies to keep floating the plug around. Like I said, I brought the most funds in that the contact for the month the rounds of what my set make.

We did about 180 million dollars in weed every month a year. Imma do billions.

With my hit, I got sixty thousand. I still do hits with my guys. I grew up on the East Coast with my guy Bump. He was the net in Miami, Virginia, Maryland, Delaware, Atlantic City, Kentucky, and my other guy shared Jersey and New York.

My guy Mall got Canada and a couple of overseas spots. This was why I needed my own network. Mall got the other and have the large part of the network. I was just an underline. They did one hundred billion selling drugs. I bring in two, which float 1 percent of the year. I was trying to populate areas in pairs: France, Rome, Italy, Spain, and multiple area south of China. The way Mall got it floating from overseas got Miami jumping. I first send all the fund to Miami since I was in organ. My pack got bus down through taxes, then Miami. I got forty hittas in Houston that populated taxes. I had over five thousand people that make mob ties. That means they are hittas. They floated to the plug before I got to them. I bussed down to taxes just to support Miami. They linked in Houston. They liked me, and I didn't gotta be there. They were all bussing down and linking with Bump.

Bump linked with Mall. They bussed down in New York and went township by township bussing down pounds. Mall had the upper region of the map and out the country.

We link for mob ties in Philadelphia, New Jersey, Allentown, Atlantic City, Virginia, Maryland, and major meets for population.

We met in South Carolina, North Carolina, Philadelphia, Chicago, or Memphis. We picked these spots because this was where we have large mob ties and gang control. Everybody here would catch anybody

and grab them while my guys and I started this team. We threw out a set with mob ties. They both trusted us and liked what we did and the people we bring and how we handled business.

They let us be a hitta gang, a mob set. We got over 135,000 people that joined this set. We all still did hit. I brought in about 2.5 million in bodies a year. These were guys that ratted and came home or they were telling or they thought that mob ties were the wrong set to be banging with.

My first million dollars made me the connection for the West Coast. I was just a underline. I had to make value. I had populated areas that I controlled or become respected with just the residence I stay at.

I had been doing this for seven years. I plug everything to the plug. He liked the underline, and in our last meeting in the East Coast, Mall took me to the plug from Russia. That was what the last meeting was about: investing in oil and diamonds and smuggling drugs throughout Russia and China. The Spain connection was there with the Paris connection. They was going over a five- million-dollar deal that dealt with properties in the West Coast. The Chinese connection and the plugs were gonna be the front for gathering the funds. The Spain connection and Paris connection was gonna smuggle. I can get eight hundred million dollars' worth of drugs. My plug floated me 368 million dollars' worth of my usual. They know imma be back in a couple of months. I was the American connection for the Spain and Paris drug pipeline. Mall floated me this deal. I was now working as a network.

I linked with the Paris plug in Seattle to do a ratio amount of need to supply Rome. He said seven hundred million. We have been meeting for two months. I had been floating money regionally to the plug. He had moved up in mob ties. The plug was from the set. He brought the drugs for us to sell at whatever place it was coming and to expand. They came to the camp by the body. The plug was bigger in every part of the state for dropping of bricks, pounds, keys, and whatever else we were smuggling around the world. We didn't go past them. We went to him with three hundred thousand. Together, my guys and I got two million dollars' worth of work seven years ago, and because of us, he moved up in the mob ties. He threw the setup money. It couldn't buy you happiness, but it could buy you guys and a hit camp that would run

a sweep on anybody that sent in a good favor or a rat that was about to turn information on a good mob. We got there and did what we do, and he dropped the papers himself. They ran the network that the plug he good.

I met with the Paris plug to take hittas to Rome. I took sixty thousand hittas. They linked with everybody that the Paris plug knew was trapping. They are now fifteen thousand hittas, and in Paris, they sent me all kills. You caught a body that month. My hitta was what I told a mob of people that I brought to a meeting. You know something, say something. Anybody can die.

We didn't just kill each other. We didn't aim at each other to do nothing other than get money. If you were fucking with the money, know that anybody that could spot us, we kill. We all kill you caught the body grab the work. We fam. They respected that we have an operation in Rome.

Rome flooded Greece and Italy. I had now my own network. I have five hundred thousand hittas that control that part of the world hemisphere. I was Paris and Spain's best friend. We were hitting spots like England and London and working in China and Dubai.

I link with Bump and Mall in Virginia. They bring me the ratio of properties we needed to move up in the mob to be underline front man. Whatever they were doing, we were funding and getting kickback.

The mob got music companies, landscaping company, energy company that dealt with the Russian smuggling drugs throughout Russia, and diamonds. The mob got warranty for some parts of the world, meaning abduct and find the jewelry zones, these were the places where they get the diamonds. The mob found out they were getting real diamonds out of the ground all across the world.

My hitta found 2 percent of the jewelers and can flood 85 percent of my guy's deals. The plug pushed it up to the for the set to be the underline front guys of the mob. They appreciated the meet by giving the hitta to open season on the 2 percent. We all got names and faces and spots. It was over ten thousand people on the like. I snatched six jewelers a day. I started killing two at a time until one spoke, then started to record them and bring just an abduction to body to lose the mood up at the end of the mouth. I answered eighty hits and got sixty-four spots. I was set. I

was doing the same. The spots I got were being weighed for amount of jewels and scout for how well they were keep what guns to bring the 2 percent came back as eight thousand spots.

We got 500,000 hits overseas in my hemisphere under gang control to prugareai bang my 135,000 under gang control to bang 700,000 hittas. We gonna prung a diamond zone. It was close to Thailand.

I could take control and be front of the underline business in the mob. They called open season deem and seize. I was ready to seize the land. We reached the zone. I used 50,000 to rush personnel out. This place was kept like a city. The personnel got dropped. I sent 150,000 to rush the troop that was guarding financial access.

They only had 75,000 troops and personnel. I rushed 500,000 people to fill in as fit, to kill or to populate. This was to come commission while we looked for their allies. The mob was the world. There were trillions that answered my call, over 2 percent. We underseed a sector of land in the world. In three weeks, we killed who they wanted in. We were on high alert. Everybody answered the call while the gangs waited to run control.

The mob rebuilt the diamond zone, in a pipeline for world assets. They move 7 trillion dollars' worth of diamonds and oil from my sector of land, seized and deemed. My deem payments was 1.8 trillion dollars. I was the contact for the mob. I was on high alert to populate another zone. My hitta in the zone before China was saying there was oil and they know a couple of troops that can get the zones swapped. We just got to do what we did for the diamond and oil zone a couple sector over.

I seized the zone. I have two million hittas in this part of the world that rushed the zone. The China troops said that the old personnel was asked to leave the zone. They were stealing China. Looking the other way, we had Thailand, which had zones that have docks that led to the rest of China. This zone that I now operated brought in a project of six trillion. I got three hundred billion to sector this zone and ran it however I want.

The China plug found me through the Spain connection that floated them. They were the fronts for an owner in the West Coast who was smuggling in America. He said there were billions of spots, like the spots I supplied in China. He ran a ratio of his smuggling in Asia. It

was forty billion. He was bussing down in seven mouths for another ninety billion by the American New Year. He wanted me to populate China. He said I could be the plug for China, floating seven trillion dollars' worth of drug passes, and I would get the one hundred trillion the guy had. But he ran out of work and could not populate China. I got four million people in my set that could traffic anybody over the world.

The mob floated my 7 trillion dollars to fund smuggled drugs around China. I dropped of 1.5 million hittas and pick up 2,000 hittas a day in China.

I was in Paris when my operation opened up in China. I had to meet the Paris plug and Spain plug and the China plug. They were all now my plugs. Now that I was the plug China, I have to kick my plug something from every spot in the world. I had to populate to take over grow zones that they controlled.

So that was the way I was moving now. I also moved up in the set as plug Bump and Mall were not putting out the same production at this weight.

MOB AND SETS

This just meant I was bussing them down with work. I was doing what the plug did for us. Mall and Bump kept set value. Everything go through them. They funded not in the trillions network. Adjustment, that's all.

I was in Paris, and I put five hundred million dollars on ninety-five jets and one hundred billion on cruise ships and oil movement to gather. By the time I got to Paris, eighteen trillion dollars followed. I sat in Paris for a week, serving Durban poison gas. I blew a pound in a couple of days. I started counting when I got the first trap ten grand. I got eight million. I was there for almost a month, moving my black Lamborghini that was custom made by Bentley. It was red inside. I blew an eighth in my Lamborghini before I went to the jet that we left as is. I smoked on the jet to let off an attack and to throw a bomb.

I would go everywhere with 278 shots in my clip before I got assaulted with 599 shots. I used 1,800 to get to my Lamborghini a lot because a brun is Jen roulette under gang moment.

I got a call from a front man from the mob to float an artist. One of the hittas was trying to be a rapper and for what he did, he got praised. He was from a spot, and he was running that into a rich zone. I was asked to be head of his everyday residual, be his eyes and ears of the corp prick. Anybody could be FBI. They knew me and him. Together

we're gonna leave a whole body edslaty. I kept twenty-five hittas meeting day in and day out.

Bro got the deal. He came to Paris to record at the studio and to shoot the vid. Me and Bro blew a couple of Durban gas. We played Madden and went over a couple of songs. We wanted to hire a producer to promote the song.

We took the black Lamborghini back to back to a mob club in Paris. The plug showed us after he weighed the money. It was all there. He broke everybody down for me being there and for me getting it there. I got two hundred million now. It was just money coming in, nothing but drugs going out. I was in my ninth year. We had to jet and hit London up. I met a singer through her production, Kristina Agerlera. She was looking for a new music label. I was looking at her ass, sending sex vibes. She was going back to the black Lamborghini. I left Bro. He was good in London, banging and selling drugs with mob ties. I dropped them of over the crowd.

Kristina and I woke up at 5:00 a.m. in London. We go over for a way to use her at the label and how she would sell internationally. She gave her price. I called the league. She was set for life. Before 8:00 a.m. London time, I got a ninety million on dollar music and an action deal. She had also done profession acting work that sold me. Can Kristina blow nine Durban poison gas weed in my black Lamborghini? We headed to the jet. She had to go to the studio in Hollywood, LA, that we fund. I went to the jet and left her in Seattle. I had to link with Mall and Bump. They want Los Angeles. They got every set waiting for us and running gang control in LA. We knew all the spots over the world we stay out of for the last twelve years, and Los Angeles was one of them. Why fight something that is not fighting you?

Ever since I moved up to plug the gang populated with sets. They were heavy at under the hitta's network. Now every gang wanna meet, not to start beef but for us to run gang control. This was what I wanted to move up in the set—for its spots. We can take over Chad, Sudan, Egypt, and Angola. It was a good move. After Bump and I go through, we were gonna populate and run gang control in building sets and populate zoning for gathering of other locations in that sector of the world. The ratio was four hundred billion. The ties and sets that came

from us dropped off enough to keep me in that range of the deal. Egypt got oil and gold. We got troops in China, and they got UN spots that ties go to. We have been here long enough to meet with them, for I terminology drops and meets overseas that's the mob family and that's all overseas. We get caught up in the States. We were shooting everything. We got extra clips and bombs.

We show some growth spots close to the networking area: Saudi Arabia, Iran, India, and Burma. We got the same Seattle setup in Thailand, but we distribute oil from there. We got multiple docking areas and zones. Fright work had been going on there for two weeks. We moved seven hundred billion dollars' worth of drugs up to the population of China. After we met, they were good, until I had to float more to keep production moving. They move fifteen trillion worth of drugs through China in five months. That was what I picked up on and floated to the mob ties, to buy community commercial, whatever flip the mob got.

We were going into year 11. Kristina was worth 289 million. I get 600 million. Bro was not a pop star, but he was doing 98 million. I got a 100 million for his production and managing. The family was looking at these moves to dig.

I took the offer and went public as a American realtor owner. I worked for a couple of years and made legit money and opened an account. The mob was in high places and whoever protects them and show product, keeping everything in line. They'd be at home on the weekends with the kids' work on Mondays. They had me on the label as a peer and advisor. It was on only 200,000. I did cement and sold my college bachelor's degree to Wall Street. I have a grand total of 289,000 of legitimate money that been invested in all mob ties. I was ready to start purging areas that the gang didn't control. The mob liked money, and we were populating sectors.

I went out with Bro to his award show. He put on a show. Kristina did the same. Bro took me to an artist, a top-selling singer. I knew her through gang control and zoning for a grow spot. She came to see me for cities all across the world. She also did sex trade for willing ladies. She owned strip clubs. She brought in eighty million. We were meeting to open these sports up in America. She said ten million a city; that

was the production ratio. She handed that over to the mob ties to do what Mall do. She, the queen, had ten million a city under her control. I lost her head count of chicken. I was understand using the porpetyan the willing factor. This was an American statement. We don't want to throw bombs on sheets of ice if we don't have to. I got the caught. It was about eight hundred million every two weeks. Now we are recurring more to deal with the customer every day but might just be the guy we got to kill. We follow everybody. That was how many were moving work. Anybody tracking shit went missing. They stopped showing, and we populated areas in all types of ways to know things to get quality to have zoning for trafficking. We don't trust American cops. We would have to be seen by people to handle day-to-day operation. We replaced over seven million hittas and moved them out to the world production of networking. It was up and running. They knew how everything work. Same as before, you got to chop out of the state. I sent a purge pass for America because high alert was different there. The mob collated a good list of 78,000 people and 1,000 district that were ready to call the National Guards to cause a distribution of business. Seattle would not got hit, but spots like Philadelphia would get swept up. That was a pipeline production piece of the world floats.

I met with a female set that was reoccurring and ran gang control for sets. I was thinking Los Angeles sent me female sex artist. I fucked forty of them and twenty-nine of their employees in the past month. They loved to show my secretary fucking me at this point, and if they get caught, they were not telling.

The one I was meeting today was the one to set up and run day-to-day operation. My federal income passed the bar. I opened sixteen strip clubs. I fucked ninety of the ladies that work at these locations. Kristina Agerlera introduced me to Brittany Spacers. She suck my dick, and she let me face fuck for a long time. Brittany introduced me to Tramra Hall. She let me dick her thirty times in different ways, and the same way, she took me to Cardi B. She suck dick like a champ. I busted in her throat in three minutes. She took me Range King Mrs. and took me to the girlfriend cast. I fucked them at the same time and became their sponsor. They handle a dick like ladies. They were adults about sucking my dick at the same time and taking turns. I got a call to

fuck Pinky and Sarah Jay Pink's cousins be sucking me off at the same time and fucking me in the same room. I fucked Pinky off cam. She took ass shots. Sarah sucked me off in public and fucked between cars. She was a champ. They called for this dick. I started running ladies in front the strip club to show an entertainment. They sell more after being fucked or seen naked. Now I drive in five million. I gave it to the ladies. They have been chewing on my dick since they got here. They were not going one at a time. They have been fucking every day, getting money when I gave them that five hundred million. They were everywhere I went. I liked getting my dick rubbed. I figured that out the first day they followed me around. They were kissing my dick when I walk past. They asked what to do with my nut. I must say, "Swallow, or it is going be true, my bitch is my baby mom."

I got to the jet in Seattle. I dropped my pussy off. I rolled up and start bussing down and counting money. I got to meet in a grow zone with Mall. He got a sector in Russia that he built to rush for oil. It has been four years since my sector zoning, and I got a lot of camp populated in that hemisphere. We go over what we can scout and how we were going to invade and sweep. There are allies that can step in and chase a struggle. They could build an expendable experience that we did not require me to have seven million on hand that can rush an area for zoning first. We will send in the mob ties dressed in Milton gear, then operation sweep of on-site personnel, then gather intel. Allies follow a scouting that when the mob sweep before they drop in position. Mall had the Russian guys, Canadian guys, and every other international ties that we ever ran servers for. The guys that put us in position to run point. I just manifest my area zone invading blue scale.

They were happy with the results. They have troops in Mongolia to build a region in sectors. Over these sectors were growing zones. If they were killing, they moved packs in rotation.

I sent two million from my China populated zones to rush the bottom position of Russia. Mall said he was in control and ran in with one hundred thirty-five thousand. Five hundred half back the Russian

ambassador reflection of observation. Mall sent fifty thousand until his count hit one million. This took five days. They rushed a large sector of Russia. Mall's team was purging Russia at the same time to drive as much as the population as possible to populated the area with power and control mob ties and gang set ruining the oil trade mob ties. They worked their way into Russian institute ranks and found the oil plots. Mall was in charge of that hemisphere. Drug flow had been like this for five years now because he was responsible for the traffic. He is in charge of seizing the oil zone.

He had been at it for three weeks now. He rushed off the on-site personnel, and the mob liked open season to whoever they got to pick up. Mall didn't zone the area right away. We have to purge Russia and curve their sectors to gather institutional gain over the land. We got names and faces and open season for all mobster to kill on-site. They sweep 38 percent in eight months. We hit 40 percent, and the mob ties with sets ran control to function outer host to find the zone. That's 90 percent jump into ranging a ratio for Mall. His response for twenty-four trillion in oil production and have five hundred thousand camp members report to him, and Los Angeles sent every gang member past with as many members ready to purge or run control eight thousand people at a time. They run packs in America after zoning from a growth spot. This gives them control rights in the gang. You die when you see them before your spouse to be seen 100 percent of the time. I told them to do that. Nobody fucked with the money we got. Camera and tapes were in every spot. They ran the game for protection. I keep them six thousand at a time. Ower ties in gear were Monday through Friday, 9:00 a.m. to 5:00 p.m. to keep them in the office and at home on the weekends.

So we shot 116 until we were done blowing up an area. I used to keep 253,600 shots, a hundred bombs. Now it was 6,000, then we increased to 24,000. We threw 98,000 shots in hours and threw 2,000 bombs.

Before the last shootout before completing a zone sector of a Russia hemisphere, we chased off a bunch troop that track a section of the camp. They were beefing in a spot. They broke down to three thousand, and they were trying to recover. They linked two hundred to call five

thousand. We sent ten thousand to help three thousand from Ower camp. I didn't know part of the world they were in, and they were under Mall's control. My rotation of member reports from two hundred fifty set. They needed me when we find the spot. We were gonna run a sweep. There were world personnel. The ten thousand turned into fifty thousand. The first seven thousand that got there were getting hell. It was like we were getting set up. The numbers were dropping. It was like they were fighting with the world prosnal from meeting with overseas mob ties. They explained and rushed to them before it get uncontainable, so when I found the spot, I sent seven million, and Mall ended the smoke. By the time they rang of the beef and drug, Mall's ties were dressed in gear, running a zone, and established Russia diplomatic diploma. Meaning they sent suits to meet with their government to gather and distribute oil exchanges throughout the globe. The mob controlled thirteen trillion of oil assets, and Mall and I were advisor adjustment. We just manned the zone of land and kept anybody but the mob and gang set from picking up for oil distribution on other location sector.

Gang set were an underline in oil. They were large in Ower's growing areas to this. Some things just don't change. They were reoccurring for troops overseas. It was the same. They don't have enough. We were trusted to rush those areas for control over gold, oil, and diamonds. I thinking about using them to scout Egypt, to run a drill under provision, getting personal section as ambassadors; but we could run into sectors' allies. That was why I said that Drill use Ower's troops under mob provision to do what we did. Under a week we were gonna overthrow Egypt's organization structure. They have a government, but they also have a king. We just supported the gang, a set organization structure, whether recruiting or gang member intermediate.

I was in Los Angeles and set a meeting in Seattle. They brought back numbers and ratio supply production process zoning. Process zoning was new. This was when set and ties share the population of the pipeline, and when we rushed Egypt, we run this connection with the revenue and the zone prospects through the properties I own and the fronts we buss money down at. I had already put the money in Montgomery County to float as fit to legations.

The troops played between Egypt and picked a spot for them to meet to war. They picked a growth zone. We got 500,000 hittas on-site. Egypt sent 135,000 of their troops. They sent 45,000 after 135,000 troops died in 48 hours. They sent another 58,000 then sent 365,000 to show representation of resume. To protect the people they lost in a week, they even sent allies to try to fight in these growth zone that purge in Egypt.

While their numbers dropped within two months, their borders and city were under gang control in population of trafficking and under political seizures. The sets of Los Angeles and I took over Egypt now. We and in world meeting Mall with Russia, and I got Egypt. I went from seven trillion in oil to fifty-seven trillion in section asset. I put forty-eight trillion up for Durban and bussed down ninety million a month in the city of kings and community alterurums. We're used to showcase talent for major distribution for FCC use. I used the Durban like it was set in place and, through my gathering, to get to this city as I geared up to distribute Durban and oil to compounds to sector another exchange for legations. My clatter, of course, was to find series like a vet appointment.

I learned faster in this life when we meet. It was about the money. We caught bodies. We got caught. We went to jail, not the set. I was shooting Bump, shooting Mall. We all stayed with 25 in a spot, a block. Wherever we go, we got 185 shots a piece. Those are handguns. Everybody got 1,800 among us. We will throw those shots to stay out of jail, to run in a zone to populate the last two sectors. We got world assets. We plan to throw over 4,600 shots, and we also have 100 bombs among us. We would blow a small township away, then would run a sweep as moving up in mob ties have me in more gang meeting to distribute drugs to Los Angeles and their international pipeline to smuggle drugs and supply. We got grow spots all over the world. The only spot we smuggle to is America because the production is in grown zoning, meaning we're not to grow outside of where I distribute from Seattle. I moved over roughly billion dollars' worth of drugs. Bump got America's drug zones jumping. He had been linking with me and Mall. We were populated enough. We distributed to 85 percent of America. We have been trapping for ten years now.

Me and Bump were in Seattle smoking Durban poison gas. We smoked a pound and bussed down sixty-eight thousand pounds, also playing Madden for two, almost three. We got a gas production property in Seattle. We distributed electricity to community. Got it at a mob meeting to run as fit. We only allowed mob and gang sets to work here so we could chill down by the docks in an office around water, and a couple yards was our jet. We smoked and bussed down pounds and distribute to sets and ties. We just moved 36,000 pounds in 2 days to the whole Upper and Midwest region of the States. The Los Angeles sets came by, brought by the criteria of what we were, drug dealers and killers. They also brought mob rep people that can handle electricity.

We started at bus twenty thousand pounds at 6:00 a.m. We were done playing Madden. The Bro sent the new album. We played it and fishing what we were bussing down. I get a pop line deal when the new tie and set came up with a ratio to distribute throughout Chad, Sudan, Egypt, and Angola.

I remember nine years ago trafficking drug throughout Philadelphia. The mobs there had me studying how to wrap up soda. Never damage the product, keep up production, never run out of economy pools, and never trunk away employment that you make exceptional. Don't under or overlook operation.

I remember wrapping up enough to severe point for weed. I would run through bodies to supply spots that had the township and county jumping. Mall and Bump had the same out. Let's it just bust so much you could want out of this life. I just wanted more. That's why we were set. But we started in Philadelphia, grew up in Philadelphia, and expanded from Philadelphia. I remember when I first went out West. I was bussing down Philly pounds in hours. That was around the time the plug blessed us with gang set to take hits from mob ties. We started to grow, and more money started to flow, and now we got Russia and Egypt to distribute and handle exchanges to run gang control and zoning for mob ties.

We get a ratio from bump to hit diamond plots south of the border. Bump had been in control of South America for 13 years. He was the lead mugga money mansion of the team. I was getting the most fort, but the production he was putting up was coming back every hour. He had

been building all around Southern America and got scouting going on in South America. His was the plug for 15 percent of South America drug flow, and he supplied 32 percent of their international fronts. He built a section under the mob throughout South America. His mob ties were thicker than Mall. He made every mob meet and brought his own section to the mob in 12 years bump, not in the trillion zoning of the mob but in control of all mob hits. An opened-up open season in South America for diamonds. Bump ran a sweep with holes in the zones. They came back, but it was local or near response. South America have crude rights because Bump got his section and liability recruiting factor, the perfect pic to traffic drugs with no harassment backlash. When they get stuck, they gotta a chance to jump the wall. We noticed potential properties we could receive to be in front for.

We just caught bodies and reoccurring events to gather for legations of sets. We grew up with it, just me and my Bro. We are my like my cousins. We go everywhere together. If not, we took 80 and 1,800 shoots with clips, and they got clips and just as many shots. We only carry the hand bombs across seas. We purge until we have gained the lead.

GANG HHG CASH FLOW 1.0

Me and my guy Bump got South America undergoing zoning after invasion. Mall got Russia, and I got Egypt. Together we control 95 percent of the drug flow, and 25 percent personal to report for mob interrogation other mob tie work ethic meaning causes we take control of all judications of fronts and possessions to run control for reversible, of course, of reoccurring ethics and other education. We want to be assigned to assistant principal and project Prothallus. We started body for the mob at 16. Bump knows the South American mafia, and Bump control 86 percent of Prodigal in current events. Intel from murders improved cash flow.

Bump also ha populated with enough hittas to keep it floating. I pushed and wrote work. I would never touch or never started to I buss down pounds of Durban. Bro and then Chill were they go and touch base. If we gotta link 190, I was always buy the jets after I get Dot the work were I was at. If everything go well, I was on to the next growth zone.

When you do zoning, it was setting an area for your operations. These operations made a percentage of an output of cash flow from these sectors of the world. We control an area responsible for 85 percent of the mob's operating cash flow. Bump has made his first spilt to the mob. It was 40 billion a week. He was gonna do 985 billion worth in 7 months. He was the plug for 15 percent of drug trafficking from South

America that LEDs to world, and he has populated in spots of America we do have operations at. I stopped floating, Bump worked when he got a growth zone in South America. His ties with the mob was heavy enough to help them not to be seen.

I was on my jet, bussing down tons of weed that me an forty others gathered from the grow zone. The grow zones all lead to the jet. You are not getting to this jet unless your fleet was dying.

I had been on this jet smoking gas and bussing down into pounds before I went to Paris and Spain. They used the method of population and now used the water to distribute weed up and down a section of the world. They been smuggling to these spots, supplying enough for city size.

They came and moved eight billion dollars to meeting spot in South Carolina. We went to the meeting to get the head count and discuss project zone with fronts from the mob.

We linked after hour ten. I busted down five hundred thousand tons of Durban poison gas and nine hundred thousand pounds of purple diesel. I threw it in the mixture for an hour. I blew seven dtuchis of Durban poison gas. The coke was grown and made at a specific zone. It was safe to smoke on my jet.

To gather, I weighed seven hundred million worth of weed. Forty a piece was twenty-eight billion dollars. The sets moved out, so the mob could take place. I ran gang control so that I can work that way. The set dealt with inner cities across the world, and I grew up in a set. I just got money in the mob doing what they tell me to do. I lived with my set. I go wherever they go, and my hitta go wherever I go. First, on the docks, and compounds were used. We built this operations. We didn't break ties.

Mall and Bump hit me on a three-way. Bump's production was what was in front of you. Mall and Bump have been doing business together. Production got bigger. Together they are liable for fifteen trillion. Their production was up since Spain an Paris's productions were picking up. They were recruiting responsible new people to smuggle

and traffic, and the mob was called for somebody, but we didn't know who. They were not sure, but they were getting more money, and they were getting courted, still running operations. I swung a set to scout they were getting. Court operation was compromised. They were still spending money. My plug met with the China connection to run a sweep. They brought me eight billion before the money was accounted for. We shared it. We courted the Paris plug in London. We smoked a fleet. We started with thrown shots, then had to throw bombs. We went to London to war. We stayed for four days. We blew a lockdown. We started a purge. The Paris plug was dealing drugs with an embassy. We left them at home on the weekends. We track down the Spanish plug in France. He was easy to find since we were beefing in London. We pulled up and threw one hundred thousand shots under an hour. We got them on high lockdown on this side of the world.

Everybody were coming out. It was like an American playoff series. Everybody was trying to control this outbreak. I stayed with 6,000 hittas. They were coming to this spot, 250 to 1,500 thousand people at a time. By day 3, we had enough hittas to start some shit with personnel. We got sets and ties, floating 68 of half of 45 at a time. They had been rushing and purging, building those numbers into 350 killa at a time. Those numbers had been floating and multiple for days. We have over 79,000 people floating at those point, and the papers just dropped to run a sweep when we found the Spain plug in France.

There were 79,000 that just got a scout count to multiple into 2.5 million local call. They had been parkin' for bodies since we got seized with bullets, blowing shot to get to the Paris plug. They started lookin' for the Paris plug 4 days ago. They ran down on the plug team and have been beefing with them long enough to find the Paris plug to kill him. There were 1.5 million ties that rushed France; and 250,000 were killed.

The Paris plug we started smoking through France shit look like we were zoning for sets. There were 500,000 that rushed Italy and Tunisia, and we got enough in that sector to hold control. We were working to get down and around Spain. We have the bottom and going into Morocco. We killed who we needed to kill in France. The Paris plug operations were on fire.

We left that shit light 15 hours ago. There were 1.5 million people left to catch, more bodies. There were 40,000 got there first and started some shit in Spain that got orders to run a purge on the Spain's plug zones. They were rushing spots, 35 killa at a time. There were 40,000 there.

They were rushing the personnel as fit. They had control of the city in twenty-eight hours, and that forty thousand have everything under control, so two million was with me. Open season just dropped for Spain's operations. They had been dealing with us for about five years. Who knew how long they been around the family? It had been a week since we killed and burned down the Paris plug. We blew bullets at Spain's operations. Wherever they were at, we blew up the plug headquarters. It was like my headquarters in Seattle. Everybody got a headquarters where everybody come to pick up weight. We distribute tons from Seattle. We ran through onsite personnel in seventy-eight minutes. The Paris plug got wind of bullets. We had to knock off as much as this shit before duration of their case frame. That could be bad for the weekend, man. With kids, he would do life because he knew the effort to keep them out of jail. We could float them. Somebody's out of these Spain operations. Now they were snitching Bro, and they love us. It was gonna work out. The plug just dropped the money. We knew few names, few new fronts' names.

We rushed. They led with gear and kept running down on operations until we did an area ratio account, for they brought me eight billion. They moved ninety billion worth of work. Whoever was a part of that, we scouted. We kept tabs. This was at the bottom of the list for using. Nobody was supposed to be telling. We knocked off under five billion of projects.

We are purging Mall, and Bump started sending sets. They got a response to them. They had killa. They send three million to killa to help run control. We were running control on burned zones thirty-six thousand at a time. We need this plug to kill as much personnel as possible. The personnel were troops and cops. Remember I said America was like a sheet of ice of the world. We got a lot of set and ties to stay safe. It was only about one hundred billion of use with guns and bombs, but there were trillions of troops ready to rush us, and we can't find the

Spain plug. He could be in good hands and could been in their hands pointing meeting spots out in America. We have international meeting spots. We don't go near the USA troop or cops. He could ran straight there. A week ago we burned four billion dollars of operations. We got open season for ninety-eight billion including America. We bang in Bump section of the mob to rush America personnel that belong to Spain's plug. They knocked off one hundred million in sixty-two hours. They were sweeping with no real control of what was going to happen. They were dropping them at meeting for drug deal gone wrong. What the news had been saying across America. Three days ago Bump got wind of the Spain's plug major operations. The connect for Spain's operations was supposed to be there. They linked the scouts. The sets rushed the connect spots. We knocked off thirty-nine billion of operations that led to twenty billion of operations. We have forty billion left, and they directed exchanges from my growth zone. We blow through fifty billion of operations. Ten billion we had that personal brush. Anybody we could not verify, the mob and sets left it to us to handle that shut down by letting us find that out. Spain had traffic friction around me. Nobody was supposed to be telling that the mob had called for somebody. We will smoke through ninety- billion-dollar operation. That gave me a light. I can trust this set up. Mall and Bump hit my phone to let me know it was cool to meet.

I had to go to Allentown from Seattle. We were overseas for six months, burning down Paris and Spain's operations. I spent two months trafficking eight billion. I had to burn.

We stop bussing down to sets and ties and just ran remote legitimate mob fronts for four months. It was a New Year. We met in Allentown with the plug and Chinese connection leaders from sets across the East Coast and Los Angeles. Gang control was there. Bump, Mall, and I were brought back in, and since we burned down ninety-eight billion, we became mad men in the mob, an inner circle for the sets. We got the highest send from the sets. We could have any gang member answer for whatever. We were just allowed to be a set now. Every block or zone or wherever there was a gang, they gotta come to us, for whatever hitta set was now the gang's best lead.

We met in Los Angeles to buss down to every block that dealt drugs in Los Angeles. I had up to Seattle after rotation began moving to where they know who to go to.

I was not supposed to be seen since my growing zones could be exposed for shutdown. We closed operations in growing zones eight or nine month ago, over ten billion dollars' worth of operations. I was only seen by regular killa and traffic drug kingpins and mobster rock stars that will kill you before it gets to court. We knew because we had to send control to keep you out. You start shooting when they rush up and make it to the corner of your block and make it to your gun. We heard a shot because we attempted to get to the back door, then out a window. We were running control on whoever was rushing us. All we knew was that shots were fired and we had to help get to the pack we respected.

I left the bros to head up to Seattle. I got scouts watching and moving throughout my headquarters. They would kill you for anything and nobody. My statue is this: they got one hundred to a thousand to run control it. There was 800 billion coming out my headquarters a year and 345 billion floating to keep production moving for sets all year. My headquarters was responsible for 1.9 trillion dollars of drug trafficking from this spot. We are not ready to die for 80 personnel that think. Those thousands other personnel was enough to rush for whatever being made in Spain or whatever. Spain's plug was gonna live.

4

MEET ME AT THE TOP

I was in the States, and I was trying to gather my thoughts on why I have to stay hidden and the Spain plug was gonna live long enough to rip at my fiction of my network.

This was why I got all my scouts running my operations. I got people everywhere all over the world, and they were under Bump supervision. Bump was moving my work and running control from scout's interviews. They were chipping away operations forty to sixty-eight million a month. We were three months in the new year, and the gear have to pull away before they start losing numbers. They were running rotation for a year. I have eight million hitta in queue, slowing purges down in the Paris plug zones. He was dead, and his connect were gone. Their traffic stop and the rest had scouts rushing their operations. That was cue work set drafting to never allow them to go around came back to zones that were about open back up. We were three months in the new year, and my scouts were on somebody's top. They reported to Bump.

It was somebody from the DEA who made a deal. We had not seen the plug since Allentown in a meet two weeks later that was supposed to happen after we left LA. I thought we were back in hiding. The plug was hanging with the mob. They were running control with scouts. They were linking to purge America.

They wanted to rush the DEA. They said nothing else. We were gonna run a sweep on the DEA and get as many of their allies to responded to find the Spain plug. The mob ties knew what system to start invasion on the DEA protection of the Spain plug was what I was thinking. Kill all that shit before they rush us.

We sent twenty people to start a mass shooting in area to bring out SWAT in an area that was under investigation. The people that came out were from the DEA. We got them lined up. They rush SWAT. DEA was there too. I was a distributor. There were eight killa in the house including the thirty on the block. Fifty were in the area. There were only fifteen dressed in SWAT gear. The district went for the eight, and thirty rushed them, and the fifty flowed because of the mass shooting. The terrorist in ATF United came out. That eighty turned into two hundred ninety. At this point, we have two thousand rushing a spot in America. We open seasoned on the DEA and whoever they could get. They were trying to control the process at hand, but we got a purge because under this open season, we have twenty-three to thirty-nine people mass shooting or running purges across America. We have two thousand killa that have a rotation that was already there in multiple by hours. Head count of killa on-site rushing cops discombobulated on-site personnel was fifteen thousand. We started a couple of days ago. This spot mob ties were reporting responsible of Spain plug's statement. They have movement. The mob trail for him was getting hotter. To hit this was good. He died or somebody that gotta run containment got a 100 percent of getting hit. Coming out here, the sets were ready to run control. From scout's interviews, the mob dropped every movement, for who they were processing. It was a list we didn't know of. No names. They all gotta hit. They shouldn't be telling. We controlled 95 percent of the world drug flow, and we were in the mob. We hit the close spots at the same time every day in a row. These guys were not twilight workers, and the area watch personnel were low enough to move fifteen set members to control an area hostile shine quality because we go everywhere with each other.

We will use 290 to get out of a township or city. We smuggled drugs in pounds to small populated area. It had been a month. Mall and I pocketed 2.4 million dollars a piece of bodies. We only used 400,000

a piece to populate in pounds in these areas. At this point, we got 7.8 million dollars' worth of drugs going out, and we had been flipping 250,000 every time it came in. We got about 40 million. The gang was reliable for they were vouching for trafficking, which was good enough for plug production. We were mid-seventeen years old.

On the second year, month three, Mall and I met mob scouts after Bump and I bussed down enough to start productions. It took 4 to 3 hours to buss down into pounds and an hour to mix 290 which was disturbed in a hour. They came 15 at a time and picked up the product and ran rotation until Bump met with me and Mall to keep double to float productions to the plug. It took 82 hours to make 500,689 thousand dollars apiece. This month we were allowing set members to intake just as easy hits scout rack on opts. They were outside on a watch. They'd be outside after a murder looking for town rep gathering of reports. It was bad that gets the area market as body zone. We have Bro that were now liable under set control. They were showing progress through other murders of local detectives that had a percentage of mob cases. They led to the FBI. My guys would kill anybody. My guys sold drugs and gave everything a shot. Everything was a go.

Scout your job, be at your home, and follow if you have a nine-to-five. We expected alert roots you a chief. You left the set, and we would drop you for exchanges. Gangland just knew we couldn't let Bro go. He had seen some hot shit doing some hot shit. We couldn't leave them or let none of that shit go. They floated to breach. They checked on anybody after the numbers came back, so four turned into nine, which turned into a quick thirty-six.

I remember when my 12 turned into 7 before 36 because I was on set 4 and 7 was told district a community high-alert friction. They were pulling 140 ratio. The guys were chopping, and 7 were there. We were 4 deep. We got 5,000 bullets to run control and to bang in a spot, which brought 32 to 36 in scrambling the district. They 147 appending the event. We open up purge to 290 and linked 600. That was our liable for trafficking, that 900 we got floating around, and we took leave to report a zoning to the mob that had ties to control an area. We don't go near cop or troops. We beef with it. It was almost 10:30 a.m., and Mall and I didn't get out the city until 4:00 a.m. We had drop Prugecalz in

the call for the 600 so we can get the plug production funds. We ran a sweep by the 6:00 a.m. news.

The district just asked for it to never happen. Again, they tried to stop what last for eight hours murders around the state.

This list was a sweep to be done in seventy-six hours. We did it in eight because the list was a part of production that have to do with mob projects. We came together and blessed each other with ties to set Mall, the scout that the leader of the sets and operations. He was just a gang member like me. I'm just a goonie. He was my leader. Bump had been making his worth by moving the work. He was fifteen. They brought them through because he was on sets with us. When we came on the set, Bump and Mall and I went to school and lived blocks away from each other. We linked, blowing faces of Durban gas. Bump was thirteen. Mall and I were fifteen. We were seventeen and five months now.

Bump and Mall and I pulled up in a red Buick with tents in Allentown. Bump was reporting for sets, filling in for sets that need interview deployment, and in the area we were in, he saw a township crow that came by. He saw sixty-eight. That means we got the spot bang in enough to run a purge. We saw them in the area. They could were come in from faces were matching. We got six hundred floating, and the ties were setting ways of a time-frame drop twenty-three perfect in fifty-eight hours shoot onsite of scout interview for who was not a liberal of sorts. We run purge of zoning cap setting. These was one personnel mass shooting. We would send a shooter as needed. It was in ranges of distinction. These mass shooting would go on for the time frame as sets saw fit. To meet set class to become liable to the gang. If you are not in the gang, we have to personally kill you.

Mall and I did this for three years, catching bodies to be production of plug trafficking. We were running gang control because the set rules are air tight. If you were not joining the gang, you die easy.

We run gang control because the guy that follow sets indoor outdoor lights can come around us. We just kill and sell drugs for money while you are with us.

We run gang control for three thousand members on the set. This was almost the New Year. Bump turned sixteen. Mall and I were almost eighteen. We were planning a network operation. Mall had a meet

with the plug that we had been going to for the past four years. We had been trafficking his work and whatever he floated and whatever funds we had from murder. The plug met with mob fronts and mob leaders to smuggle at the zone. They disturbed from or to. The plug was cool with the money we made them and made an offer to run control for zones. He saw enough scouts to relay a control process in the world.

We respect the murders for the plug. We become floats for the plug. We got whatever we make as much as the gang can make. They were vouching for 400 million in a 7 months, a ratio of 1.9 billion dollars head count for plug make set recruiting. He was liable for me and Mall's work. We never had a bad pick or drop off. We gave Bump head count and set of South in Carolina. We got a lot of killa that do it just like us. It was twenty-six thousand for Bump, me, and Malls. They got Bump in rotation for low production of drug follow.

This was what happened, and what I remember nine years before: becoming a self-made man, and Bump becoming a leader, and Mall becoming a boss.

We were twenty-five and under when we first got hits around the world. We showed precedent with violent murders by using numbers on personal and mass shooting on regular demographics that lead breaches. We gained trust with an underline that had ties.

These ties grew every day in sets. They don't want to go away in a way we don't know. Why are you around? You die. The list started to manifest in ranges. We can't decide the outcome or occur or stop outbreaks. We were there to body and get paid. We got about 168 million community from killing to drug production in an 8-month range from 17 to this mid-24 of age. We moved up as mobster and sets control and gang leaders. We killed the Paris plug, and we were looking for the Spain plug. We have ran purges for 2 years overseas, looking. We started purging a year later in America. We found steps to find this breach 4 months into the new year. The mob incurred shutdown of projects that could lead to asset shutdown and other operation coverups.

I was running control to deem Egypt's assets production. I sent scouts to keep the zone in population for trafficking from a grow zone. We were ready to kill the personnel, but this was the sixth month year two of killing the Paris plug, burning a ninety-eight-billion-dollar

operation. I was in hidden class. I moved with mass shooting value if it was enough of y'all or one to any number four gonna turn into ninety-nine to seventeen. We are liable of a high risk of being abducted by troops or local detectives. We have to be retrieved by gang members of the city or the numbers don't stop growing. I go out and wait for an area that the Spain's personnel and plug was from a scout found were they came from. We blitzed the city and found the Spain's plug on his block. We ran down eight flowed after we killed seven on the block. One was that we were running like we running into combat. They weren't ready. Three that were thrown shots to was with the plug. Everybody got shot. It was the troop we had to deal with. They tried to pick up in Spain from France. It was too late. We were growing faster than they were dying. We started beef with what scout track down. We can run a sweep. It was just Spain we run control for cities. It was just us. Remember we were not in the trillions. We tried to buddy you. We will be at your home at this point, running the routine.

After killing the Spain plug, high alert started to drop and more. Production became viable for the arts and breach. We killed those sections in a month. We took over time. We just got up in ranks. We went and threw the ranks to run control and to have network operation and established a life we could live.

I met with the mob more with Mall.

Mall was now a boss and a leader boss of a family in the mob and leader of Mafia. These were ties. He was the leader of those numbers, and Bump was a leader of his own mob tie that have connections to the Mafia. That was why the mob did it. This was why Bump and Mall were to move as they were just for the mob.

We were meeting to do zoning and gang control for Egypt. The scouts have been moving in queue for almost four years.

Mall and I were at the meeting to open up production in Egypt. The scout three-year ratio was fifteen trillion dollars' worth of whatever we can bring an operation through Egypt's populated zones for trafficking. It made it through the purge, and we were running interview from. The mob reports to me, and Mall was now mob leader. Bump now worked for the mob. He handled them as he saw fit. You die if we can't move you forward. We treat you like rookie when it comes to the gang.

The meeting we had was about my scouts that reported hidden value has become visible for outreach to handle day-to-day operations. The end of the meeting was about meeting sectors. Mall was supposed to report me to run point and keys of the purge movement of poses ions and proclaimers of traffic to control for other supply to area for drug flow back to bussing down tons until rotation to Seattle and all operations. I hid from or in appointment or under friction movement to sets and ties operation time frame was six to seven months. Mall and I had been linking with Bump, ringing links that build operations for a face value of thirty-four trillion dollar. We vouched for under sets class, meaning these was what went in and what moving through the set we run control and maintenance inter decor for fronts and possessions.

We were being hazardous for mob ties. We began to make levy report to make reps over mob with violent class, meaning we are more trustworthy than a liability to the mob, and we should control one hundred billion people for population and project of prodigies a prospects of murder and other zoning friction to take a pay out to while the change in sector and section shutdown to relay breakdown. We take all outcomes until production was no longer worth risking. We will not step away from experience until we are under breach. The fulfillment is 0 percent of involvement of self of damage to a life no preservation. We understand risk, and they under no meltdown down or shut downs or breach just a coverup for hot production and managing funds. They take us on and now run control over the mob because we kill whoever and shutdown whatever they have projecting.

5

FLOAT

Bump and Mall and I opened a headquarters in Egypt. This spot was use to report for the mob all over the world and gangs and whoever they bring or send from across the world. There were seventy-two houses in control of populated zones with smuggling being in operation for two months. We were making a friction in gears to deem there treasury, meaning their oil zones have been being knocked off the whole time we were knocking off Spain's operations. We were down to the odd number of the rang set to personnel. We have been rushing them for four years and have control sets on the underline of their assets. We plan to smuggle to the reoccurring gear. We have built troops in army's across the world to fit a frame of voids and crude. We kill everybody before they can report to allies or kill their allies. We were doing fine with the violent tasks to gain complete control of a zone until the mob ties came through. Now my set have three thousand troops every part of the earth. They were link into twenty-six thousands, and sixty-eight thousand troops flew under set an old mob ties. We got enough to open livestock for oncoming optimistic troops. The six hundred thousand can sweep five billion in a year. We want a new world order of the region to populate in these sectors. We were sending scouts to open optimistic class for open season on the personnel that flow. We can fill one hundred billion men and uncountable ladies to be face value of new world order. We set an agreement, and an uprising had been made viable. Kill onsite,

purge on com one on four with zero to six mass shooting on whoever were out of bounce.

With the region being in uproar, the set had to show leadership and presentations. We allowed the sets to run zone population under set rights. We have open season on everybody that's not on this side. We don't care if you are not telling. If it a good day, it a new world order in progress became a citizen. Thirty-six thousand were zoning an area. They scouted for a range of population. They are locking out old production. New production would be in operation and under control in seventy-nine hours. The set number range of five hundred thousand got approved for the same movement in the hemisphere. They had been scouted for the same duration. They have been purging the population into curb activities and to slow other production, to have a sweep for eighty-nine hours built-and-burn operations.

They have 1.8 million members flowing at this point. We were in month 2 of new world order. We are on high alert to beef, with what all sets wear engaged to do this. We had everybody on go. We had a ratio number of a hundred billion counts that were following leads to 20,000 of what we cuddlers as retired. There was no time to hide. We needed whoever you ducking to get hit. We even put bombs on sheets of ice to blow. We were killing the cops onsite for around reps and finding troops to drop and leave the scene hot. We ran into army post and took leads to where they flew to blow up. We were on a no-contact notice. They just know something was lurking out of there reach. We were dropping report personnel. They had series them into spy years with the government linking. We were risking 600,000 to come out before time, and they don't need TV time. We occupied the networking prostitution. It looked good. Better try as hard as you can to stop the unknown outlook of outreach for a monopoly of breaches to lager region value to set a direct line to begin friction of unwrapping value and worth of exchanges of power among killers, an invisible man. We can't have everything. The way a life was progressing along.

I bussed down tones and shoot troops to run traffic control for kingpins leaders of gangs. I was in Seattle and driving my black Lamborghini. I was in a section of the city that was lit with ladies. I bag a lady in fifteen minutes. She was going to the shopping mall and

outlets that one hour and thirty minutes or under. We went shopping, and I spent forty thousand on Gucci and ninety thousand on H & M that was made my Louie Vuitton. They also had custom-made Old Navy made by Louie Vuitton. I sent \$385,000 on myself. She dropped \$25,000. I spent \$6,000,000 on here. We went to eat at the food court. We talked about where we were from. I told her I sold drugs in her native language. She was Asian.

We headed to the jet and went to Vegas. She liked gambling. Me too. We stayed in Vegas for three days. I spent over a million dollars. I dropped her off at a hotel suite, and I picked money up from the block. I put three million dollars. I drove my Lamborghini. I have black Lamborghinis all over the West Coast. I headed to the jet with her to go back to Seattle. We landed, and I drove her back to where I met her.

She called me two hours later and said she was at work.

She asked, "Do I like free food?"

I thought, *You are exact.*

She said, "Naw, I'm a connection."

I asked her where her work was. I linked her whole setup. They were good for twenty-five million dollars that they bring every year.

I met with Mrs. Jones every week for casual sex and operation of other spots in the West Coast she got jumping.

This second month of the year I would be twenty-three years old. She was twenty-one. Me and Josie were just fuck buddies, nothing more. She had friends I had linked to for sex trafficking under sets. That means I vouched for Josie, and she kept her business from breach of the zone operations.

She was good and set for life because I have a network operation. I just populated the USA for funds that came every month in three million dollars. I do what I want under operation rights. It set as a network treated like an operation.

I meet with Josie's girls to go somewhere far to traffic some ladies back from a smuggle zone. I had been getting set to make exchanges to habit traffic for the plug. I brought 26 sex addicted ladies with me this time. Then 15 three days later. In 252 days, I was up. This was a love song.

I'm not responsible for colt value of up bring of sector for sex. I dropped fifty-eight ladies to sweets that Josie had control of it only, but so far, I went with Josie's ethic. She showed me as a guy friend or just a driver when I was in her present.

Josie was being trusted and made it through gang trailer. She joined the gang, and everybody she dealt with passed to join the gang. They killed everyone that they had around. Now Josie had her own set with the gang. Her people were in rotation of running operations I'm liable for an have to run control of.

I headed to Minnesota to meet some ladies I dropped off. They wanna have sex with me. These were my ladies. I don't force them on other man. I stayed in Minnesota for three months. They were listed as colt. They knew what I do and where I was at. They are not used. They come and go as they please and ask to not speak about the Lamborghinis and the amounts of weed and never bring no one home unless you were fucking that ladies, and if I check her out, it could go wrong. I keep a scout checking bounces.

It was spring, almost summer. I was back in Seattle, meeting with new ladies. I took them to the outlet and broke down seven million dollars between thirty-eight ladies that want to buy Louie Vuitton, Gucci, whatever was in that area. I stayed almost two hours and spent \$250,000. I hopped in my black Lamborghini and linked with sets, and Josie's ladies were there with gangsters that were now liable or accountable to me. This is the first time we had this meeting because they have to understand we sell drugs and smuggle all over and be aware to shoot personnel. There was no way you get back around me if you don't empty the clip to get away from whoever chase.

The ladies wanted a sit down because of the violent attribute of dispersing a situation. They have people that work in banks. They can die as they were not supposed to be around. There was a button that was supposed to be pressed that was in every bank, those open big vaults that hold forty million dollars in it. They knew it was gonna be forty million

because these vaults were connected to the ATM in the bank. I agreed to send who they needed and where.

They were popping ATM vaults every day. I was twenty-three years old now and responsible for another set an control under plug rite. An operations were maiden as I connected, but I was listed for control.

I went and linked with forty ladies to check them out. I got floating mob and gangs meeting at the mall for fronts. Got this set under Pearle Vision for experience of international settlement. They were not leaving the state. Josie's was out in the world. They dropped a bunch, getting 160 million dollars a week for a year. She made more than what anybody made this year. She moved up to the Starz. Mall was telling me they put the leaders of that set in hiding. We can't breach. We did not police the army. I was left to control Josie's responsibilities of the day-to-day operations. I picked up twenty ladies a day. Three check out for sexual favors. By the end of the month, I brought by Josie in a day number of ladies. I had colts of ladies that watch homes and cars. These ladies were good in manipulating a setting. They have us in college check who really smoked. They passed gang value, and these ladies were bring me campce money, one hundred thousand dollars, from one college. A day in school got me thirty-five million dollars; the others, the same or lower. This was gonna come for five years. This was a song highlight.

I was doing front operations at this point in life. I handled drug flow control and maintenance of populated area. I had zone and mob operations and analysis of offering and divine. I met the ladies every time I ran control over eight thousand ladies and go talent search and throw one hundred millions. I manipulated these settings the same way I would run control over drug flow into a college. I would price myself in the entertainment life. I linked overseas with Kristina Agerlera. She was from the West. We met every day on the East Coast. The first spot was Philadelphia. I have production grounds. For entertainment, I was her peer on this deal for eighty million. Kristina was my wife if we would start a show and my fuck buddy in life. She was beautiful. She was just my buddy. She had entertainment rights to run as fit. She brought Tracee Ellis Ross for a meeting. They both sucked my dick at the same time. They didn't know I sex traffic for willing females. Kristina was in charge of who comes past. My next meeting was with

the Bella twins. They went to my home, living in a township. My legitimate funds pay, for they take turns and share. I got a contract offer from Brittany Spacers. Kristina was in charge for two, almost three, months. It was just grown ladies at this meeting at Brittany's home. She was getting ready for the holidays. I fucked Brittany thirty times with the ladies that was getting the house ready for holidays. She was my baby mom. I busted in her over thirty-eight times before the month was over. Me and Brittany had dinner every night. We went over her friends, contracting, and her aunt's porn company. She walk in wail. I was dickinmondona Ms. Joseline and Paris Hilton and her aunt Brittany own a porn company. I face fucked Pairs Hilton on camera and fucked Brittany's aunt on camera.

Kristina sucked me with Mrs. Ross on camera. I started to bring the ladies from the set two at a time. Sixty-eight were cool with Kristina and ran high enough and good enough, funding my set now gang member agree. I now have a sex cultural life among those that Kristina Agerlera introduced by female entertainment.

6

LOVE SONG

Kristina Agerlera gave Brittany Spears a 190 million dollar per contract. My baby mom wanted to be family in multiple ways. They were finger fucking each other with my nut. They sucked my dick together and said they love me and each other. Kristina and I never missed lunch for four years. She was comfortable with my life and don't play Jeopardy. She and Brittany toured before for two months. They knew each other since they are teens like me, and my guys and I meet them two anywhere we link in Delaware. I was probed for life activity and of enjoying life coming. We linked in Delaware to go to the movie. They just came from a two-week tour. We smoked a quarter pound of Durban poison gas and did hours for four weeks. This was my life under mob. Hidden gem rights they have over me. I was only seeing the ladies from the set, and they have colt class of gem rights, so when I go out, the ladies quickly jerked me off. When my baby mothers were not around, they would get to it when appropriately, like, say, I was out and the population was to zone, she would suck my dick so fast. She got three minutes to bus a nut in her mouth or drop set rights. She talked about what she would do under set control and gang meeting last known facts about the meeting, or I just net a big-ass cop inversion unit that just flow. I got the right to start a mass shooting. My sets rights and structure was, they go wherever I go and I go wherever they go. The mob made dangerous optimistic troops viable, so I was on high alert with my set. We go anywhere.

I got abducted one night by my ladies on set rights. There were fifty ladies there in the area. Josie ran control from there. For twenty-five minutes, she swallowed my nut after face fucking her for twenty-five minutes.

She said, "Back to work, star."

I finished fucking the ladies. We fucked for forty-eight hours. I went to go run operations with Kristen. We were putting together a game lining for Brittany and other ladies in entertainment. We ran two days of projects for production on entertainment grounds. Major shoot areas were on the East Coast. We had a studio for a rap that had Bro on the set. We thought we had found a green zone. He just went for it, and we were there. Bro was ready to be me under projecting life capabilities of life statistics that the over cement an enchantment of 100 percent. The Viking king believed he could fight without being seen. I must be able to see shit before it came to me. I see everything two ways but really think one way. If it didn't work, I didn't wanna use it. Won't try it. Won't go near it.

I was now thirty-one with two baby mothers who I can trust. I live a double life in front of them, and they will not down me if they leave because they know the moves I make. I can be the guy they want for the kids. Everything was about their life. They didn't go out of meeting area and their face was not public or for entertaining everybody else. We die so we can live or live to have no preservation other than for another life. We were reliable for each other. We were just killers that made a lot of money selling drugs.

I meet with Kristen in Allentown. I fucked Skokie and gave her rights to open up Jersey Shore. I got head from every lady she brought by giving them all bad-girl rights. It was this ritual were I face fuck every lady for a while. They saw me fuck Paris, or she told them. I think she told other ladies, but they are taking these face shots. They were smacking loud and screaming on my dick the whole twenty-five minutes and still taking dick. They were telling me to ass fuck them. They pop their pussy the whole time. I was ass fucking them.

Brittany Kristina was in the bed with me. Kids with their family. They live under the chief. Brit and Kristina wanted to know where I was getting money from. They did the math. I spent 9.8 million dollars on Louie Vuitton and 1.6 million on Lamborghinis. She counted to forty million in weed smoke. I taught her how to count. They grabbed weed from me. She was right on a one hundred billion on international and location property that she found in the papers. This was not office work.

I told my baby mommas I was a self-made man and a gang leader because I had been killing and making them money my whole life. I ran and oversee all operations. I populated and appointment of population of whatever went on almost sets mobs and gangs. I got to you because I floated fifteen trillion dollars through product of habit traffic or friction zoning area for growing drugs and disturbed through the world. I just made enough and became enough for them to say it me. I was not going to jail without throwing bullets at people wearing bags. I have six hundred thousands of them swapping in for flat working where there were desperately needs sex. I ran control over colts to manipulate settings, so my troops could swap it and take place. I use my funds to the government in a legal way to bring up positioning for a region of order that was controlled by what I just gather in a mutual exchange understanding that we not getting older. We could change. We couldn't stop, and you would be my love, was what I explained to my two mothers. I told them to live the way they want. They want to get married with me and live life in entertainment and that stays private. They kept the kids a secret.

We knew everything, so I knew everything they never do, anything but go to work and suck my dick. They are probing my section for colt rights for sexual entertainment. Porn stars have open season. You have to be a part of production.

It was working twenty-three million dollars. This is the second month. They had been as they gather more than Josie did when we first this norty of being on camera makes more Josie link with me before over going and friction presentation.

Twenty-six thousands scout for eight thousand to now find White House rep. They watched twenty-six thousand people and sorted out important personnel to no person who could get sweep on livestock

and fill the quarters wherever they go to run gun line operations in the USA army sexual for low-level personal and persuasion for manipulative personal. We started this a couple days after waking of tides changing. The circumference of Celsius to millions the level drop we up, and we love these ladies for the job they putting in. They got us everything we need before the New Year. Their affection with percentage of population. We have a governor on pay. He passed gang value. He was allowed around us. We have to cancel people that make up his line to the government. We settled reoccurring recruitments. They past with gang rights and value. All higher personnel were abducted and handled. They did not meet tie RAC it ring, so we shot on-site after the gun line was made in the White House. The six hundred thousand was in position to order. Next was the region. Two hundred billion when joined the army as fit as six hundred thousand was growing to hold control in Egypt, to uphold headquarters head mining of assets to a generations that can be an underline of cover fire of spots that are polluted from what was not appropriate of the gang. I was a leader and a self-made man. This was in a chronological order of projects assistant in a percent that were just fruits of the labor.

DURBAN POISON GAS

I was in Egypt in a zone set operations to run control names drop faster than the mob. That way we got the work to pop every day. We were moving on the personnel. We were sporting allies from America jug what are now make it in to percentage range in the States to run international control. We rush for twelve hours at a time. We were purging and saw troop to load before the drop points. We ran enough locations on the ocean to throw missiles to drop a small portion. We got enough to keep it of the news and to take paperwork from gun, retelling they can't find the relay they lost in translation. We took nothing but fast cars. Josie had been having banks rush for nine years all over a million. She did eight hundred billion nine times. We got thirty-nine trillion of flipping drugs. Twenty-four percent was hers. That was twenty-four trillion. We were liable for eighty-five trillion as a team. We were jets to get in a hot zone to kill. We were still doing sweeps. They were not supposed to be there. The goonies had been purging for in America.

Early in the morning a gonnie was outside of Chase Bank. He threw a bomb. Everybody felt that this was Phil. Of what we perkin out in the world. We were throwing bombs every day. It was a lot of feet to get to the jet. We die for the growth zone. You can't have what on the jet. Take it all with you. You were selling that shit. You smell that shit. Nothing but poison Durban gas. You smell it while y'all were dying. It would gonna take a day, and we were coming. Yeah, we wanna die knowing.

Fuck it, they were at the spot found by the Capitan. He was not dead. Yeah, we were on the way to that spot. We were three hours away. We had seen it hour in we percentage a shutdown, and we would attempt a reboot. We liked to shoot. We were too much for TV. Don't know the whereabouts of your plug. He was under clutch ladies in place body on the floor in Iraq. We don't go near police. That's the first place we purge. We focused on the guys we picked. They were leaving America. They were almost here. We killed the departments that float by. They were rushing to the Hampshire to catch a body soon.

As they dropped, kill the opportunity. Everything were my intention. We were still flipping what we got, and we won't stop. We had been up for nineteen hours. We were good for six hours.

We were not counting the chase. Everybody Phil float of two retail. We disapproved to control dip faster. You miss it. I did that shit.

Bump, Mall, and I live in the States. We met the first time during the exchange for eighty-nine trillion. Josie's set ran control for population. That was how long Josie's set had been liable for money. She had been around. Just as young as me, she was not that deep in thirty. We were winning tie cleaning covers. They were taking falls. The family was doing better than before. We have been killing for seventeen years. We owned all exchanges for the last decade of murders. Everybody had died. We were running drill compounds so much they just keep it at us. I was mad because of murder in ties show them on my set. Everybody's gotta die if you wanna come back to the corner storage park keys for everybody that make it to keep going back. I told six thousand troops that for two months while they complete gang reps of traffic mining. They continued pick-up work, leaving it for control and materials of a political population.

We did this for six more months in America, meeting zones, because it money that the fronts use advise under weekend potentially both no statistics were realistic meeting boundaries. We just couldn't live life and stay militant upmost responsible tremble. We gotta run down on set. We only stand by what got me what and where I was at with my guys on

my bars that my rapper Rap about and stay Bro it. Bro, yeah, we gonna purge on the hot spot before they go to the community.

We got a control population in Egypt for scout to open season on-site whoever there it 80,000 that float two months ago. The meeting was done. We float in that part 180,000 left around the same time, and 580,000 thousand was told 2 weeks ago.

Sixteen thousand had been shown at the time we had been sending that first line of troops for two million to sit around and start filling for a parlay. We were to be identified for oil range and source of headquarters and other foundation of social to the zone the headquarters overseas operations. We let everything to fill that property. It enough to control a few city that multiple district in a America. We got enough numbers to run a sweep. They had been down there for amount that linking to my team and guys to land on allies appointment of routes. We gonna run a drill like this shit happen on the routine. Josie started to flow three ladies a day before my meeting to have them in control of smuggling and traffic. I was gonna vouch it was coming from Jose. She had been making eight hundred billion dollars. That's what Josie had before she made me available of her set organization structure. Josie also brought a growing zone in Hawaii. She had 100 percent of whatever was being grown there. Josie floated one hundred billion to the meeting grounds.

We killed the Paris plug and the Spain plug and shut down a ninety-eight-billion-dollar operation and saved what we controlled and maintained leadership and underlying recurring recruitment for population and pollution, and Josie and I understand my hidden gem rights, and she kept me in the loop with my baby mothers when they were talking about appointments of my loveable feeling they have for me. I had Josie scout the Camara in the States and compounds. I have 100 percent of my ladies, and clots were responsible for upkeep of statistics and actual provider of factors to friction. They watch as sexual toward me under everyone supervision to scout my properties. Their pussy gotta be wet, and they would be on set because I meet them one on one. I had fucked fifty thousand rotation of ladies that were colt members. They will not play Jeopardy. They are responsible for region up bring in America. They point a percentage in a local township and

city council. Multiple populated position has happened. This were my troops and were being trusted an opening for Americans all zones. We are born in the East Coast. We worked on a new world before we got meltdown that would lead to shut down after shut down. It was shooting to grab the eighty trillion dollars. We have in meeting zones. We have a treasure box in America that accounted for seven billion dollars of legitimate money from property I own. This relationship got me ninety billion in government outreach of control fulfillment under state laws and other level operations. We moved six thousand troops in an eight thousand employees that all run set control under population rights this number here working in White House's legitimate control to frame under ranges of percent from percentage. Swapping was fictional without the situation at hand.

I blow two Durban gas dtuchis and Play Station under hidden gem rights because of high pulse in southern San Francisco. The cart or whoever bump was dealing with had been in a growing zone. The plug grab over work off them. I run control from Seattle on my docks. Everybody in the world knows where it was but who was allowed on the set.

I said with family to provide poultices and populations for habitat. I was moving, waiting at a time and place under family supervision. I get the time when the block what was empty to meet with enough to comment and friction in set faults. I did this in Paris for four hours. No response from matters. No response to personnel. That was before we had to kill the plugs.

I was under the family, so I was gonna give you a alter ego outcome for the next three years. I was under the mob for late day-to-day labor del visions with meeting rights under Antalya rights to be retrieved for realtor and other outer experience that makes repaint of reports and value to vault president and other liberal location that factor for disinfection. I was sitting in my room bagging up gas.

I had been selling drugs with the set for five years. I was just bussing traps. I didn't get into body for the set. It kept me from being liberty to alternate and other auctions. Anybody can be brought out or took from the set to fulfill mob ties ever since we started growing in other areas. We were choosing to go farther. If we didn't sports for growing,

we could get left. Shooting was a part of building around us. I have nobody because I was a link to every block. This was why they brought me out. I was from auction to provide the blocks the set wanted to run control of. It was about the hustle. That was why I dealt with the set. I was a prolific to shooters to find out how it was done. He showed me the sets and gang control look that could be felt in detox. When it was time to pop something, shooter got it done. There were over five thousand guys in the set that body and grab work got to move up in set, and this was the only way I was not found in terms. I was no nut. I couldn't step away and go off and live life. We shot at the FBI, and the fall guys were in place to fall for what's there not appropriate my outcome. I dropped off a couple of pounds of gas. We linked for the bread, and I caught a body. Bro was short. I was two grand for a pound. There was no reason to be short ten grand. Bro grab four hundred thousand worth. I was sitting and smoking. Bro served somebody gas without checking his set. I grabbed to see if I was seeing shit. I body Bro for not throwing up the set. These stacks were new. Everybody served blocks. Gotta check in before you grab. Nicks and dime get you time. We don't check for but were liable, for you could go missing. I sat on the block. Bro was selling on and moved three pounds. I checked everybody that came by the same people that didn't check in. I body in a week. I knew by the task force for thirteen bodies. They put together a manifest saying I was homicidal. I was smoking my Durban gas. I got a knocked at the door. I wow. They didn't wow back. I threw eight through the door and left out the back. I was hot walking through a block. I just slipped out. I threw some shots to get off the block. I was hot enough to fit a disruption. I turned my work in for claims and figured off my body for work and set foundation. The foundation was based around my leaders they killed. They gave me a list. I traveled up north. First stop was abiding. We followed to a location. I buddy a couple guys in a house and took their longing of diamonds. These were plots for mining for diamonds I had far up north, around New York. I killed a fall guy that could not be found in leberil reticule, so I stole a phone. I was in this spot to move while cash out on bods. I have nineteen people since going under the undation. I have other bodies that the FBI knew about. I moved about thirty-six pounds a day to kill the op. I was also wanted for abductions.

The bodies were found because I was the control factor of my leaders. I was supposed to be known for this. We sent border control the other way, the long way. I was the public figure for the leaders. I make the link for Bump's pipeline, but the leads were for sweeping and bodying. Mall's pipeline was structured for smuggling and murder, and Meat's pipeline was production of legislation.

GANG LEADERS

I met with the legislation to produce. I get work to make direct exchanges for all experience. If we meet, I had to body you. I was not my leaders. I was what they were. They got work from bodies. I had been doing them for a couple of months. I made sixteen million dollars, and I was responsible for sixty million. I already had people service and blocks to matrix. My block was worth thirty-six thousand a month. That was how I made it in a day. My block went under management. We didn't run out work, and I was bodying people now, so we moved up its thirty people from my block. There was no reason for them to body. I was responsible for my block and who they dealt with. I was liable for them under auction claims were fund over nine hundred people with work. We had three inner cities under control base grounding for population. They went to us for work. Bump's reopening statement at legations. I leased nineteen million to the tri state area and moved nine million under mob provision due to the mob ties and the zoning. I was working around. I made sixty million a pair in five months. I got 1.5 million dollars' worth of work in seven mouths. I was gonna sell this work and caught bodies for my leaders. I knew I was being followed. I body over sixty-seven people that the investigation units know about. I was wanted for public shooting more nine times drop-off bodies. I got from homes over sixteen times, and the rest were done execution at all times in random zones. I was not under control. I was told to take lead,

so I was under management. I counted killing people. I was wanted and under fire to be retrieved for 189 bodies. The two months in the year, I lead them to sets and gangs and the mob breach the enough in the rise of torries. I bering during my arraignment of the FBI justice appointment to bring me in on-site. I use these sets to trap these agents. We have killed over eighty-five of them, and I got away three times before we killed thirty-nine more parts to make a sweep we have two hundred eighty-nine switches to mining for government action. This was popliteal for far alginate percent. We found a way into their based for login and went passed population to popsicle. I was in position for publishing my public status to state for interviews for run control to a grow zone to populated to discuss. The leaders believe my direction was to be held accountable for the month layout. They predicted they could die any day. We all had to be ready to hold our ground. Why we here could pop off any second. I learned I might be around the leaders and I would lead them.

I sent my block. They dealt with other blocks because my status was statement. If they were not bodying, they were not getting shit if they don't know who was bodying. They were getting drop on-site, and that guy got his work and moved work to other parts of wherever my hole block meet set ties. They have been doing this for nine months. They body in that order. They ran an exchange of 100 guys that body for money. I have 150 million dollars' worth of work. I put up 1.5 million dollars for six shooters. I pay for guns. I put up 3.6 million dollars for 18 shooters. I did this 28 times. I have over 2,000 shooters. Bump, Mall, and Meat treated out with 289 shooters.

They ran control under international rights and state meetings to gather district disturbed my block was interview. We could been knock off for wanting to chill when we were told they were gonna stop coming if they could not check stacks. We had the money, just no reason to be around. I get a city purge after a block was placed under investigation when I pulled. Their stacks weren't matching the body count. They tried to shoot back, but the city was under high risk and task force monitor my distribution was placed for national had way. We rushed their task force sixty at a time an got six surrounding police station under gun retribution. They either need the National Guard or new guns. We

killed as many of their praline as possible to go to the National Guard base. We found what the leaders was looking for. We had invaded with invisible guys. Everything went that way to body, and my two thousand grew to ten thousand. I was making lead what to a growth zone. We purge and floating underties. They made control for new to the world National Guard have everything under control but the manifest everything was out of control. We have control. I got ten thousand people killing at once under zoning control. Everybody publicly knows we have control under our breach. This was why I was a public figure to a regular citizen. We have to be knock off or dealt with. They are not safe. I have to pull in fifty thousand killers to run control in a grow zone. I sent my block and what they had while the purge was going on the manifest shows what's property to percent a large crowd have want this way. The growth zone will be in the area where the spot where millions are to complete the body to remain in figuring homicidal narrator. The leaders were justified what is coming next after I pulled in twenty thousand killers and left a million dollars in trucks that was found by the FBI. My face was on tapes from drops and murders. They now want me for running a drug organization and carrying out murders for a large crowd that I gather with that help kill FBI agents. They're reporting impersonations. The States were knocked off as joint meeting are retrieved from there reported falling. They say they have a breach. We have enough to hold place. We were and now was recognize for all sets zoning finances as espionage under liegiment gathering. This meant what the leaders projections are poultices in use. They were look at who to deal with in every position and have control being ran under set that the leaders ties friction presentation was we control the world with murder and homicidal narrator.

I was responsible for 270 million dollars' worth of drugs an 80,000 reoccurring events that my public figure sate angle that I control over 50 percent of drug flow from a grow zone that was fabric as the spot for homicidal activity all responsible trimble fact account was percent found to be rebumend for reoccurring to all gangs for leaders to relieve their ties to action. I could become president of finals and playoffs due to reoccurring for 80,000. I was under liberty, for if I die, they would think they killed the problem if I go to jail. I was accountable

for every outcome the leaders had made adjustment to bring me to a jail that I could be a ghost in. I was there but never seen outside of the structures that maintained the jails. We owned a jail. I killed people under interview reoccurring events upon often workers. When they took me in, fifty guys that have gear did it. I let them meet me for work and kill who I came with to complete the outer thoughts of a breach and control under leaders' legations. I was sent to carry out murders in jail for five years were disbursement was packaged and made for exchanges that now made for base of reoccurring events such as hey quarter recruitment for murder knowledge and package exchanges. I was set free under ties to recruiting for five hundred billion dollars. I was not Bump, Mall, or Meeat. I just floated their money through my pipeline that I was published to figure to meeting zones. I was known by the FBI and other task force as homicidal and trafficking after evading jail overseas and was seen in the states' processing caution alerts wherever I take up to five billion dollars. I take them to these meeting zones to remind the statements of a public figure. My involvement is one hundred thousand people apart of the gangs, but we're just a set the gang can run control of higher personal murders and other murders that can reoccurring to my involvement. My set published bodies for over one hundred thousand murders across the world for ten years. I was made at the time of the events and sector sections that cannot be linked.

My young bull from my block was a rapper and went to the fronts indirectly. They put them on the leaders' meet with us individual to tell us we are in the hands of fall guys, and wherever the block went, they went. They were the management group for day to day for sales that the rapper lead to his first release to the public under the block we come from an what we are known for Meeat was in captions. He had the base of the covenant of the media outlets outcome for what goes on in the world, with my block in for lead roles to play as the breaches from lyrical container to have FBI to combine their manifest in the matter at for fronts. We were now public for, and my face was reporting figure to be held in majestically as news report my artist sales were being used to tractor supply for drug and murder fatigues. Fifteen people got caught slipping from my block by agents we have no control over they confirmed no crimes in the past ten years artificial facts of

drug trafficking and other charges in account. This was my appeal to be retrieved to base headquarters or any reoccurring recruitment. My meeting was not found in interview. It had an opening operations of perversion of life to continue building a link to leaders. I was left with what's left my block because of my appeal not making it to an interview. We were no longer allowed on the set. We were not to be found by leader's ties, or we would be used for livestock. We looked like a weak link that had brun notice to never run operations. Every day we use the five hundred billion dollar pipeline. We are parlay for war of whoever stacks can't make body counts if we use body's counts that already check out were comfortable with a lining for takeover of the ground base and other structure that case the interview and delivery of scouts. We were cast to live life as a realtor of state irrigations. We are allowed to work at fronts only as fall guys for state wage for a month fall under entertainment after the sixteen we just got notice through headquarters recurring recruitment sites in jail.

I was down to me, my artist, and other guys left from my block. We shoot it out by police departments because my public figure status was left under stacks that can be founds under new murders. We use set outcasts by twenty-five at a time to be trust by ties to get sweep by whoever around us including us this last six mouths. I was in the States with my artists, and the last from my block. We have fifty that can remint to the stacks. We have body and got responsible trimble, for they respect us enough to understand their time was running short on sets, and we have killed scouts to try to make an underline of control of over leaders if we keep rushing we get approval of falls an fronts and the interview can be reassessed to an exchange meeting that Meeat had to become made in the ties. We just become the fall for the fronts to swap back in. We understand that we are not to make any attention of trying to anything other than traffic an reoccurring for murders until we body to stay alive under a praline of restructuring remodel under the core and other bases that are to set use as a set by the leaders. We remind the position through trafficking drugs to sets that answer to stacks that not spouses to be adjust for or they didn't check out if we kill you because we were a lunging overproduction of products. We made it to parlay. We link to Paris a spot that had an operation shutdown. You

know this spot is a shutdown zone for the leaders. They understand my set. We grow weed and build a population that is proctologist to a way I control over twenty thousand people that sell drugs through Paris, Rome, Italy, London, and France. I make forty billion dollars off drug flow. I got the work from sets and ties that did not adjust stacks. They respond out of respect. I abducted five jewelers and ran control over twelve bank robberies and did not float any to the meeting zones to comply to the party. I got twenty-six million from the banks and five million from each jewel abductions I served on blocks were showing progress to my stacks. I was in control of war. I was the new contact for Paris, London, France, Rome, Italy; and now I was in position to post a meeting to sweep their prime mister if I could kill them. I can get to interview for the outcome of course of war an exchange to be set as drop for bodies to supply out of the leaders. We go to war with to become made man of ties. This was how Meeat got where he had bodies and being a fall for all operations we are going out to fall for fronts as long as we can hold the structures of the shutdown zones. The interview was reoccurring to scouts to take in what they have a plug in Paris, and the block that was being used to livestock all value the vault were full. We were being made liberal for all outcomes and would continue to war as a set. I controlled twenty thousand murders that I paid to move on whoever including Meeat, Bump, and Mall to register in as a leader that can be found under response of murder stacks of you kill your stack is no longer charge and life tax and other refund request. We have the right to murder the leaders to contain respect and responsible trimble of outcomes of ties and gangs. We kill whoever for whatever whenever the ties respect Meeat, Mall, and Bump for filling the voided process an starting include states invade district to distribute to their deaf. There deaf can't we structure for over nine million fulfillment for property value. I have to pull in ten thousand a month or quarantine minutes or risk my life and twenty thousand. Life's at a sweep. Nobody was vouching for the leaders to just die. We have to abuse power to become powerful. We found a mafia in London. They link to every murder in London. They have five hundred people anywhere, anytime in the world. We make high alert statue to become as a unflinching of sets. We were responsible for mafia personnel and make a move on Bump. He

shot his way out of South America. We were chased back to a shutdown zone and fifty thousand versus ninety-five thousand made for front of CNN. They just know Reagan area was agamous for the leaders. They sent gear to lounge around, and we looked under drug access.

BOOK HOMICIDAL NARRATOR

We were getting good old judgment wanted to be cops. I put my paperwork in with Del.

“You ready? I’m gonna keep smoking.”

“You know what we gotta do?”

“You know what I’m going to do?”

“Pussy better not be slipping, Bro. Got it to the academy and some of us got test. I’m ready.”

We dropped fake bags with masks on anybody until we got it to a hundred.

The first thing I did after those robbery and homicide, I gave a couple of ladies fake cards. Other number my judgment was place to be a systematic ongoing recurring events. We have a chain on what we will do to get you in jail.

We don’t sell drugs prekszanniessruypan. I smoked on abuse of leave like the rest of my judgment. We were clearly killers. We have been on the force for two years and have had to explain why we chop the gun. We would let you run with your gun and shoot you out of aggression. For two years, the two you the judgment are in jail for life. They thought he had it on him.

This all ways ago until we get hit or go to jail we meet with judges from the deateavie population to high level and high volume offenders to up judgment true to fulfill homicide narrative upon the overall

completion. We spoke this in justice before we became cops. We are shrewd people and will angle the brotherhood of cops for the greatest fall in America history. Who cares if you weren't there. It was about what judgment want in overall. We will just stay as we are and stand with a look. I was fashionable with a vest that address national political population with my own view once again. I was not to be understood. Some people turned a new leaf. Some people just live life, and until I go your way or the other, you good people gotta experience every day in this line of work I go to. I have done a lot of jobs. I wonder how many people don't know what they are doing outside salvage what they want. I steal bullets that they think it for them, but kill who you want. I don't know how not take guns. You get shot.

We were one color, black with white socks loft. If you not stunning, we start thinking why you are acting funny. We started giving you fult. We leave you at the spot. We have been killing people since we were nineteen at house we know was good for murder a fult help. I could be placed in fult. We don't hang unless we are smoking weed or got somebody that's not a likeable. We don't hold fault to no judgment. We kill fifty to sixty people a year.

Rookie cop was what I was called at work. Random shooting was a great way to stay out of CIC mil for court something that's start investing on what we were doing at this point man down off duty in his home. No wife, no kids. What the luck of me to have people to tell what was going on with sycophant people chat ie. You wanted a husband, but I'm a man. We went around on a circle talking about this weirdo.

We would jump people multiple times a day in range of as many people we could. There was fifty people. We were placed in juvenile surrounding among only fourteen are still in contact to each other. We will kill each other if we are in fault during the judgment. We smoke and gather paperwork work. We thought of following anybody that need socialism whatever off or on duty procrastinating.

We would meet you at your intergating and follow you home. I was going to try really hard to take you home empty though for gathering of any cancel balls or were we are allowed. I take breaks at hotels, listen for sex walk a mantior for sex to find drugs to abuse and to link with dealer to handle as personnel of a cop. I will never buy weed without

taking you to jail. I can be in places multiple was or do whatever I can to justify under my bag.

We sat on an angle on want to started. I explained experience hotel for noise and faced no one go to hotel but people on vacation.

Setting perseverance, I was in control of inventory for investigation this work that good enough to bring Ci Pi and others to get me to background checks, and we found out everything I go to the FBI and steal their books and go to their logistics multiple times a year for investigation for people that go missing under litigations. I have been doing this since I was getting the reports. I make them public or what until they go public to be chain of command. We were abstract from fourteen to cuddlier murder upmost respond. This was including us. I have comment over sixteen murders under FBI case studies. They could only find out if I tell them. I was one of the district lost-in-translation personnel. I have multiple fault in line to pass worth of time and value.

I see everything but don't understand everything. I found a guy that knew girls. My lady was sophisticated at multiple murder seen the ci goat. If I use my ladies this order, I could not live with myself. This was a goofy worth getting dizzy over. We couldn't catch the sustainable inventory to make a justifiable out of a majestic sentence. It could just be something they say.

We just knew as whole this sex traffic. I liked sex not to shower or banking network to me. I understand why the FBI wanted me found. He could be among us as a citizen or something special in life, a statue figure. The public loved Trriosit.

What the FBI drew up eye level base over robbery after missing linking of profile features and prop of bill of tee of a bank robber being a drug deal, named only matched names faces don't match faces fell in place for I was personally. We have been cops for three years now. We never wanted to rob and kill someone this long. We built lacking under recoil of positions. I was allowed to be high in codder of cops. If I was here, I would been chef. We locked people up. That's what it look like we became extinct around lunch for setting of outreach who were really smoking who can fill for Social Security payments and take payments the commerddory was to deal as off set under studies for struggling lifers. We found 346 from the system of cards. We had taken on over 15,000

teens. Ninety-nine that had no links mugged us. We did nothing other than get lunch and live life. We created a private grant geriatric process to kill any court. We planned to run in the place of Atkins mental of courts or whatever they wanna call death twelve many they cool, but we bliz you right to jail lite baby smoking or a top-selling go jail. I was there in front of life age range sets a logic setting. She was there. They were there.

What is joules? They say it when you are just I likeable to me it the way I can kill you, like I know this guy with a nice Ford, not a truck. He stayed with a job and money. I remember when I was fifteen and I had friends in school. We would place judgment and juvenile surrounding and judge you on your place fault.

I was smoking my Durban, and I got a call from one of those people. There were sixteen of us. I gathered through life that we did not provide a life to life.

There were thirty-nine people we met through life gathering. We killed and had kill other people under drug abuse though we do what we want.

Comics would write Marvels for the scoliosis inputs of way we do what we do. Ford was just pick out because it was 2024 way. You got that mulbu. It could cost \$12,000. You were not balling.

We stopped the process and took a khwidtrotno they thought they stole. We were not doing nothing but smoking in chilling. Bro tried to bag Bro's shawty. He pulled the gun, and out they walk off. Bro wrote protection of your count. They gonna make it in life. We agreed what was said. See, it was nothing picking out these verbal alliances.

In Virginia, out of Creator, we appreciated in an incorruptible of thing. I do what I was told. I was comfortable with life. Some cops perverted justice. I was just sport Juda case. I was a leverage for enough murders if I was not running in control, then my FBI partridge will we purge for a justifiable outcome of none of what you think. I robbed people of ingredients in life. However we meet, I wanted to kill everybody around me, and in sorting of my justify coming back log in going to give the whole truth or leave everyone at spots as I decided as far to take it. I have explained liberty of likeness and want to count one time of eloquently under revolution of breakdown of level that will rise

to gun projects or shutdown of need able to salvage fault told me he don't preservation of gun and began a gert of aluminum in auction. I was in liberty to alternate. I had been running this curry since sixteen. I knew Bump.

I had 162 in use for criminal justice. They were liable from refills. We were okay with falls for the sets. That was why we meet and report to the scouts as we were it away to the top, and it was a way to life the leader's agreement was appointed to have control of characters.

I was level. That was what they call my stacor. I prob fourteen people for all sorts through Bump ivermectin of Montreal and metropolitan, a Monopoly effect Andromeda Alcott of gun firing and down word of dowina optimistic possession in projectile order prodigy political forest of fires an four fit staring with my down world spooky of events of the evictions and notice of my set stacking an appointment.

Starting able adjustment of alleviation of a mass shooting of two in jail curry reoccurring systematic exchanges for the testimony that will be justified by the link of fourteen officers including myself. I have been made in reliable judgmental response of level to be strain in court. I will apprentice for murder of corgis of bearing of alleged two-face value for placements of robbery of a large drug bust, and I was accused for murder. Three were under personal failure, leading to attending I vouched for murder seven found for guilty for robbery for under take money for those cards outreach I make contingent for fabric of justice for communications throw judications.

I confess to forty-six murders and product for two outcomes place that are adjusting the township clams an falling review grants and other series of statement records are in transit of for release of my date of my justify personnel. He was prob to live life in adjustment. We are running this process as many times it can led to outcomes property projecting of a liberal justice. My ad mis will arrive in twenty-five years. I applied for interview of course interrogating. I go where I want and be who I want. If I bang packs, then I was who I be and in the oldest exchange of meeting in place and can be set free when ingredients were set for my relationship of fourteen years. Meeat work fast and smart, and the other two took them in. I floated what I can to recruiting my block, who

proved leader ownership of the production that podcasts show package handler and delivery instructions of smuggling.

Under foundation of the leaders and meeting grounds and head established contains treasure box with settlement of my justify outreach to recruit of my caddie gear know as police unaffordable dress code. I stole guns and have a change of gun firing and other political gun control safety shooters with those guns. I sent to report to me. We were set for fall guys.

Under politics in the world, we face as understudy but never mind.

10

HOMICIDAL NARRATOR

I linked my resume to base headquarters' recurring recruitment for the population of district that we're assigned to the base headquarters under statements response of respect from a cop that confirmed murders as a cop who showed response of 150 people in district settings for cops. I built a 250 tie armor, and the gear was to be placed for action, and scouts had partly a response of breach now. I had spread confusion under a praline of percent to become a citizen exhausted to exfoliate to other outlets set was found as fall nine million were on high alert and beef with whoever use my stacks. I was respected, for nine million were beefing with my block. My life was in jeopardy. I was moving work into the States. I served Kentucky. I beefed with Mall when he had New York ties in real life motion. I was KC versus NYC, Delaware versus Allentown, New Jersey versus every sounding township, Baltimore versus redemption blocks. Same in Miami, Florida, and a contalconclition going to the south of the border. This was why I wanted after Bump first and rushed headquarters' base with respect and went to Paris and surrounding shutdown zones in reoccurring the old beef to cover base of structure. I know have 186,000 guys that respect my stack and line a present that could keep alive to shoot it out for my life. I made successful retrieve of finances and meeting zones up to twenty billion dollars' worth of drugs, guns, money. I was the public figure of trafficking. The zones' operations were set. I had been living in this life for fifteen years, and my numbers

were link to fall at the region statistics. This was good Meeat to stay in legations to project successful the numbers grow for my life to end nine million go to sixty million because of London control and the plug for Paris have been reopened. I moved five hundred billion dollars' worth of drugs, old fricassee for interview have been laid as I expected of my life, not to be retrieved for property or possession. I had a million people on this side of the world being motivated as terrorist and to be executed at my life to end.

I was a seventeen-year-old male that played high school basketball. I got approved to play in a McDonald's game to go to college. I loved playing the game of basketball, and playing for the NBA was my goal. I was as good as it sound. I got offered to play NBA basketball out of high school. I played point guard. I had been playing since I was five. I was five feet nine going into five feet ten. I was not going to be six feet tall. I thought I should go to college to get the experience. I was expected to join a team by ESPN. I was not allowed on my block, but I wanted to be there for my bro, so I would run college basketball because I could stay at bay. I had forty friends, all gang bang, and we are all the same age. When I was younger, I sold a ton of weed and grams of crack to pounds to other gang members.

I showed up to the McDonald's games and averaged twenty-five points, eight assists, and five rebounds with unlimited steals. I chose to play at a state college. My gang had large control over sets and ties. We had teachers to take a fall if I didn't perform in class so I could make it to my game. We had people in line to bring the drugs to campus and to scout for sales. I moved up to a scout. I reported to members that reported to leaders who could smoke or take what we brought in. I had nineteen points and nine rebounds and twelve assists with the same steal ratio that I got in high school. And in other games, the sky was the limit, the NCCA reported after my first month of basketball. I met in my dorm with my ties to get my work done. They structured my role call for class it not on teacher on my list. I did not know that they would leave me out the game. My making it to the NBA was a gift to the ties and my leaders and sets across the world. I played my hardest to bring scouts out. My gang leaders stayed in contact with fronts to give us the push we needed. When the scout showed players in the NBA, we kept

in contact with seen other players when scouts show to leverage my draft pick and to seal the deal. I was projected as top ten after ESPN mock players to be a one and done. My game spoke for itself, but the extra push was to put everyone in disarray because we were to produce dominance over life.

I had a Kia. It was black. I drove through my city college. I went off campus as a gift to sets and gang members. We could be anywhere and do anything. Anybody who wanna rip and tear at a gift, your time was up. I was under a loara, the same as an animal gives off when the weather changes or to su date the vision of who was staring to have other I bring to make their move. I was the mascot of where I come from my set. My set was known for murder. We didn't give a reconcile of money, meaning we don't use money to get where we needed to go. I caught over twenty-five bodies before the age of seventeen, all for the set, and I was still moving drugs. I never saved to a million or strive to be nothing other than being a part of the set. I had been checking stacks for two years now. I was a gift to my set and the prodigy of power and control stay focused on what you want out of life—that was control. And stayed loyal—that was power. Don't position yourself to be a threat or be a character of synthetic semications. Don't try nothing that doesn't need to be done. The leaders were liberty. We were the justification of all judications we built through commendation. We fulfill at a fulfillment exchange center. We move what was already in front of us. If wanted to be the plug of Paris, then we move to Paris and kill what they rebuild, and we will be there to keep shooting. I will probably never float that far because I was winning and dropping the points that got ties in position progress me. Also, to scout, I banged on stacks that can't be retrieved. I have killed or ordered a hit among the forty gang members. I came up with over thirteen times. I killed seven and set up the rest. The stacks needed to be bang on. That was why I was a scout and have to complete my rapping of presence. I was midway in the NCCA. I put up forty-five points and twelve assists. My college campuses were lit. I had been sober since I got the McDonald's challenge. I smoked Durban gas. I don't want to pose as a problem. I was appointed to have a PCP experience to cover viles that will leave me with crowd control, meaning the people I was around could be found in leberil. There was no justice

for the place I grew up at, and my blood would show I'm straight up for this life. I wanted to live, but one string of a cigarette and a underline of weed would cover me for life. I cooked coke and bussed down to grams until a pound was sold. This would cover the mental climate. I would be fine. I have a high tolerance, and that would be lost in this transition. I smoked a PCP dtuch off campus at 4:00 a.m. leaders adjustment for this time because we killed Dominant at this time at the leaders' administration. It was a ritual that have recurring Rembrandt events that have all the outcomes of life around me. I waited until 9:40 p.m. to return to campus. I took a shower and got dressed at a hotel. I had been place up for mock award after another forty-point performance, and I was down to twelve people I came up with, and they were getting vibes of. They all had respect response. They started breaching back to the set because we were who we were, just gang members that have leaders to respond to my team make it to the sweet sixteen, and I was the first of elite players to win the NCCA prestigious award. I was going to stay in school until my term was up. I was the greatest player on campus and most likely in the NBA. I have a cerebral output on the game. I dunk at my size to look unpreneur. I proved to hit every shot and pressed to run my d the same way as a scout for my set. I made the deals to ship drugs throughout campus to where I look as on the court unpredictable. I didn't think when I would be killed; I just seized operative moments. I killed an investigation unit and got the dean to submit to ties without being seen. It was just a name on the door. I got sent past twelve undercover FBI agents that I killed and sixteen witness that were pointing out the drug flow campus police. There was a storyline for the news of twenty-eight missing and would later be found in my third year. I was glad I won the NCCA tournament. The campus, on and off, was controlled enough for me to do the unthinkable.

I came to this school at eighteen. I was twenty-one. I would enter the draft at twenty-two after setting records and giving games to remember and service drugs and murders it apart of the run in my eyes. I went number 1 in the NBA draft. My first night on a NBA court, I floated a key of crack as the leaders gave me as gift and the youthful of the life I came up in. I was twenty-one years old. The only people that we were sure that live this long were the leaders I reported to and were seen with.

Meeat brought every celebrity he could buy to the game. On my first game on the court, I put up seventeen points, twelve assists, and ten rebounds. I was going to be starting in no time, and everybody knew that at the games. I reported to Meeat. He was now a public figure for the government and was the capital preservation. He was a treasure services agent. He was now across seas to dress in gear with other troops. We supported, and in response of ties, I was the mascot and the contract of what we stand for murders. I got approval to play Olympic basketball, I will folate as much drugs and money to grow zones. The ties were in legations of in line to bring as reoccurring events.

I had been place up for mock award after another forty-point performance, and I was down to twelve people I came up with, and they were getting vibes of they all had respect response. The ties were in legations of in line to bring as reoccurring events.

Homicidal narrator Meeat views three narrators. This was Meeat's highlight cover for the next page of product line.

We had been dealing with mob for fourteen years. I became a self-made man last year. Bump became a boss, and Mall became captain. We moved up as mobster that moved the set up to gang leaders.

When we were fifteen, we had a set of 190 that we brought to the gang that checked us as a set. We were just trapping. We were running out of work to fast and low on funds. Mall took me to a mob meet after he got paid for a body. I was trusted by Mall to do this because I got for work and burned down area and repopulated shit a set of eighty out of an area. I used 120. He reported to the mob. The had scouts in the world. I was one of them. He got me recruited to the mob made libel to the gang, not the set that vouched for us.

For my first body, I made sixty thousand. My next body was seventy-nine hours later for fifty-eight thousand. They were coming home before their time. They had been at these two spots for a year, face matching face pitchers for locations.

My next body was twenty-six hours later. I was on the night shift that had 148,000 in bodies.

I linked with Bump to move work down South. The plug gave use 1.7 million dollars of work and fronts what the set of 290 weight for we were liable for set activity.

Bump and Mall and I were in Delaware waiting for mob intel the body count was high enough to make exchanges for plug production.

We could give them his float money and get more work. It took seventy-nine hours to get his float money between me and Mall.

Mall and I met for mob intel from LinkedIn scout. Mall met with scouts in advance to gather interviews of sweeps. Sweeps were fast and easy. We were linking closest range.

Homicidal Narrator is a sixteen-chapter book about money from murders that went from trafficking drugs to living a commercial and community life of detail and delivery of narrator of scripture of the date of prodigal.

The author's name is Meeat Newton. He came up with the name after his mind TV personality years. He also did live for young world documentaries and radio. His written material are based on actual events with political outcomes and views. His other materials will be based on his alter ego personality from his social media outlets and other interaction with other political outcomes for other casting and scripting.
